

The Challenge

Assumptions

- A year has 11 months
- Even months have 32 days, uneven months have 33;
- The 11th month has one day less in a leap year
- A leap year is a year divisible by five
- A week has 7 days (Monday... Sunday)
- 1-3-1870 was a tuesday

Assignment

1. Write a function that calculates what day it is on 28-3-2014.
2. Create a montly-view calendar for choosing month and year. You can use any framework you want.
